

# Product Change Notification

## UK Conformity Assessed (UKCA) Marking

<b>Notification Date:</b>	25th August 2022
<b>Change Notice #:</b>	001-2022 Rev A
<b>Affected Products:</b>	All Synrad products that comply with CE (Conformité Européenne)
<b>ECR#:</b>	ECN-11392
<b>Description:</b>	Addition of UKCA (UK Conformity Assessed) mark to our labels
<b>Implementation Date:</b>	August 2022

The Synrad team would like to thank you for your business and continued partnership with Novanta.

As you may be aware, there is a new requirement for product conformity in the United Kingdom. The UKCA (UK Conformity Assessed) mark is the United Kingdom (UK) product conformity marking that will be mandatory for most goods being placed on the market in Great Britain (England, Wales, and Scotland) beginning January 1, 2023.

By this notification, we are informing you that we are incorporating this requirement into our Synrad product conformity process. Synrad products that adhere to the current CE (Conformité Européenne) mark will be impacted in this transition. The Synrad team believes the most efficient approach to maintaining the technical, quality, and delivery standards during this transition will require the updating of product labels and supporting documentation to maintain compliance with both the CE and UKCA marking requirements.

Custom products that do not ship directly into the UK may not encompass this change, unless expressly requested by the customer. If you have a custom Synrad product, please send your request to your Novanta account manager.

We value our partnership with you and thank you for entrusting us with your business. We also appreciate your understanding and cooperation during this process. We look forward to continuing to serve you and your product needs.

If you have any questions or concerns regarding this matter, please contact your Novanta account manager.
